

***Smart, Efficient Energy Solutions  
for Business and Industry***

## About UGI Energy Services

UGI Energy Services **supplies and markets natural gas, liquid fuels, and electricity** to over 40,000 customer locations across the Mid-Atlantic and Northeastern U.S. We are a supplier, marketer, and midstream services provider—one **backed by 135 years of natural gas experience**, plus our own **expanding energy infrastructure**. Along with buying and selling energy commodities at the wholesale level, we own and operate key electric generation and midstream natural gas assets throughout the northeast.

Ultimately, our focus on personalized service helps us develop solutions best suited to your unique needs.

***We have a longstanding history as a natural gas provider—one that our customers have backed for decades.***

# Our Services

*Convenient. Dependable. Resourceful.  
Experienced. Impressive.*

## Natural Gas

*Reliable, collaborative plans for short- and long-term needs*

Because we are an energy marketer that owns and operates our own natural gas storage and delivery assets, our natural gas plans are highly reliable both financially and physically. Equally important, our focus on providing highly personalized service helps us structure plans tailored to your key demands.

### **You will benefit from:**

- Fixed or market-based pricing options designed for every budget
- Controlled commodity costs with plans based on predetermined NYMEX triggers
- Guidance on managing cost components, including key drivers like the cost of gas itself and delivery location
- Energy supplies beyond natural gas, including maximizing your purchasing power by switching deliveries between natural gas, fuel oil, or propane to take advantage of product price differentials and market conditions

## Electricity

### *Cost-effective electricity plans with fixed or indexed pricing options*

Our electricity plans can help you manage your expenses more proactively with two smart, straightforward options.

- **Fixed Pricing** – Score electric power at a preset price for a specific period of time. This option is perfect for budget-conscious customers that want pricing predictability.
- **Indexed Pricing** – Get power at a rate indexed to the hourly PJM Locational Marginal Price (LMP). This option is attractive for users who want to take advantage of market pricing and are willing to accept some level of price risk as indexed pricing constantly fluctuates with market conditions.

Unlike electricity marketers that only buy and sell electricity in the marketplace, we own key generation assets. Our facilities are strategically located in western and northeastern Pennsylvania and are part of the PJM Power Pool. By combining and optimizing the use of our own generation assets and the broader PJM Pool, we will keep your facility dependably supplied with electricity.

***We know the industry inside and out,  
and we are available when and where  
you need us.***

# ***Our value goes beyond our fair and honest pricing.***

***We're a specialty energy provider dedicated to  
solving almost any problem and striving to meet  
each of our customers' needs.***

## Liquefied Natural Gas

*The provider of choice for companies who count on LNG to fuel their businesses*

Liquefied natural gas (LNG) offers a safe, proven alternative for propane, fuel oil, and diesel. We have been making LNG available to our customers for more than 40 years. We have an excellent safety record and team of engineers and technicians with extensive LNG experience.

We can support on-site LNG infrastructure requirements with project funding, system design, construction management, and more. We are a one-stop shop with the resources, talent, and a proven track record, guaranteeing confidence and assurance with every project. Whether your company is large or small, we have an LNG solution to help you power your bottom line.

***We do not want to be just another provider to you. We want to be your energy partner for life.***

## Midstream Services

*Bridging the gap between lower-cost supply and efficient, reliable delivery*

Midstream Services brings affordable natural gas to markets that need it. We do it by bringing natural gas producers, distributors, and marketers together and connecting them with the assets and services they need, including our pipeline infrastructure, plus storage, peaking, and power generation assets.

### Our Assets

- Temple LNG Facility (Temple, PA) – Peak Shaving, Storage, and Liquefaction

## Businesses We Serve

With significant expertise in buying energy products for all kinds of industries and businesses of every size, we have all the right options at our fingertips. We can skillfully recommend customized, cost-effective energy solutions tailored to your needs. Together, we will create the right plan to help you reduce and control energy expenses. Our customers include:

### Small Business

Are energy demands consuming too much of your budget and time? We will help you assess your energy-buying habits and develop a purchase and procurement plan that works for you.

### Industrial

Together, we will develop flexible, proactive service plans and strategies to keep your operation running despite market disruptions and volatility.

### Commercial

Mitigate the impact of shifting gas supply networks and seasonal price swings with strategies and energy supplies backed by our own electric generation and pipeline assets.

### Government

From participating in the bidding process to consulting and expertise, we will help you best manage your energy costs and requirements.

### Institutional

Manage your services more cost-effectively and maintain your quality of services with a highly reliable energy supply.

### National Accounts

Manage your multi-state, multi-region energy requirements, control energy costs, and maintain productivity.
